Upcoming DXpeditions

For more information on current and upcoming DXpeditions please have a look at www.mmmonvhf.de from where most of the information here was gathered unless noted otherwise.

Hide JH5FOQ might be QRV from the much wanted Japanese square PM62 later this month. No exact dates are known yet.

There are no official announcements made yet but there are rumours that there could be EME activities from two much wanted DXCCs (one activated for the first time on EME) in October and the first half of November.

For 2024 there might be a very rare DXCC on air: In February a DXpedition will become QRV as CBOZA from Robinson Crusoe Island in the Juan Fernandez Archipelago (FF06NI). The plan is to activate 2 m through 160 m using SSB, CW, RTTY, FT8 and EME (6 m and 2 m). The dates of the operation are 13th - 20th of February 2024. More information can be found at cb0za.sierranevadaspa.cl

Time Table

7 Aug

The August Issue of the 144 MHz EME Newsletter ready for download.

30 Sep – 1 Oct

Autumn Session of the ARI EME Trophy 2023
